

Out of the gate, we requested a truck Leasco didn't currently have but they searched and found us what we wanted and did it at a fair price. We're very happy with the program, the truck and the way we've been treated. At the end of the lease, we're going to buy out the truck and we're pleased with the low payout price. We're just real happy with the way things are going in this program and with our business.

Team Operator*

I recommend a lot of people to Leasco. Every time I call ATBS, I get a straight answer. With the program, I stay on-top of my business, my maintenance, so I don't have any surprises.

*Seth Aguirre
Solo Operator*

ATBS Leasco is a great plan for drivers. It is a great way to get them started on the right foot as an owner-operator. Every driver we've put on through Leasco has been successful. It's especially good for new owner-operators because the addition of ATBS services teaches them they have to save for maintenance and taxes and run it as a business.
